The most authoritative way to find out what has changed in between PostgreSQL versions is to read the Release Notes (http://www.postgresql.org/docs/current/interactive/release.html) .

A summary of major changes in features is at Feature Matrix (http://www.postgresql.org/about/featurematrix) .

For general guidelines about the most common issues encountered when upgrading from one PostgreSQL version to a newer one, see Postgres Upgrades - Ten Problems and Solutions (http://blog.endpoint.com/2010/01/postgres-upgrades-ten-problems-and.html) and Upgrading old versions of Postgres (http://blog.endpoint.com/2010/10/upgrading-old-versions-of-postgres.html)

8.3 Changes

One of the biggest migration concerns the removal of implicit casts has broken many applications. While ultimately these programs should be rewritten to correct this incompatibility (samples (http://www.depesz.com/index.php/2008/05/05/error-operator-does-not-exist-integer-text-how-to-fix-it/)), it's possible to add back in missing casts to ease migration to 8.3. See Re-adding implicit casts in PostgreSQL 8.3 (http://petereisentraut.blogspot.com/2008/03/readding-implicit-casts-in-postgresql.html) for scripts

Here are a list of articles about new features in 8.3:

Some of the articles previously available were lost in a server crash; these are currently unavailable but might be restored by their authors eventually:

- work_mem tuning and log_temp_files (http://people.planetpostgresql.org/shoaibmir/index.php?/archives/7-work_mem-tuning-and-log_temp_files.html)
- Upgrading to 8.3 - MediaWiki lessons learned (http://people.planetpostgresql.org/greg/index.php?/archives/136-Upgrading-to-8.3-MediaWiki-lessons-learned.html) (talks about implicit casts and tsearch migration). Can instead try Upgrading MediaWiki from PostgreSQL 8.2 to 8.3 (http://julien.danjou.info/blog/index.php/post/2008/05/19/Upgrading-mediawiki-from-PostgreSQL-82-to-83) and Upgrading PostgreSQL 8.2 to 8.3 (mediawiki) (http://blog.gugl.org/archives/24)
